

REMARKS

The foregoing amendment to the specification is presented to perfect priority and/or parent benefit and also to eliminate multiple dependency of claims 3-9 and 11.

With regard to the changes to claim 5, the original PCT application described that a p-substituted phenol derivative represented by the general formula (2) is condensed with at least one compound of the phenolic compounds represented by general formula (3). The phrase "at least one" should refer to the compound of the phenolic compounds of the general formula (3) only, and not to a set of p-substituted phenol derivatives of the general formula (2) and the phenolic compounds of the general formula (3). Support for the change to claim 5 can be found at page 20, lines 17-21 of the English language translation. Support can also be found in the original PCT application.

It is respectfully requested that this Preliminary Amendment be entered in the above-referenced application.

If there are any additional fees associated with filing of this Preliminary Amendment, please charge the same to our Deposit Account No. 19-3935.

Respectfully submitted,

STAAS & HALSEY LLP
